

STEM OUTREACH Via the GASSSS Program

Employees can share their passion for science and engineering by participating in the GASSSS (GA Scientists/Engineers Supporting Science/Engineering for Students) program

- Work in a classroom, science fair, after school robotics club, etc. – your choice!
- Pre-made presentations and other resources are available
- Employees are reimbursed for up to \$500 annually for STEM purchases*
- A charge number for up to 9 hours per calendar year is available*

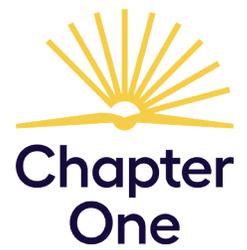

For more information, visit
sci-ed-ga.org/gassss

**Approved GASSSS application required*

Participation in the GASSSS program is entirely voluntary

ONLINE READING VOLUNTEERS

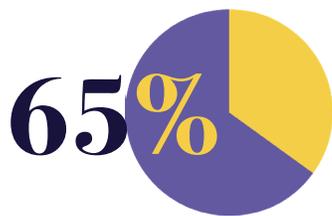

Join our team of volunteers and be one of thousands of busy professionals who are spending 30 minutes each week reading with a first or second grade student and making a direct impact in the lives of students from under-resourced schools.

A child who can read is set up for life. Not just because they do better at school and have better job prospects, but because they are happier and more confident.

It all starts with literacy.

65% are not reading at grade level.

The 2022 National Assessment of Education Progress (NAEP) reading test results demonstrate that 65% of U.S. fourth graders scored “below proficient,” which means they are not reading at grade level.

FLEXIBLE

- 30 minutes once a week.
- Matched with the same student for the entire school year.
- Volunteer from anywhere!

ONLINE

- Online training.
- Choose your own reading session time.
- Background check required.
- Live chat support.

REWARDING

- Easy-to-use platform guides you through each session.
- Fun, engaging activities focus on building reading fluency and confidence.

This is not just a literacy program but a program that gives children pride and hope. It encourages them to do more and be better.
