

a grand challenge

fusion power could change the course of humanity

no greenhouse gases

virtually limitless fuel

YOU can make it happen

COMPUTER
SCIENTISTS

*I can program this
so we can turn it
on and walk away!*

PHYSICISTS

*Why did
the plasma
do that?*

*Do room-temperature
superconductors exist?*

*Power systems
GO!*

ELECTRICAL
ENGINEERS

*This machine has to
survive the most extreme
temperature gradients
in the known universe!?*

MECHANICAL
ENGINEERS

*I need to find something
that is radiation resistant
AND won't melt!*

MATERIALS
SCIENTISTS
